Company Overview

Brixius Manufacturing Inc. specializes in custom metal fabrication. We create industrial parts, large or small, working primarily with steel, aluminum, and stainless steel. Our company was established in 1945, a family business spanning three generations that has spent the last 75 years perfecting our work in metal fabrication. We care more about our work than any of our competitors because it is more than work, it is our passion.

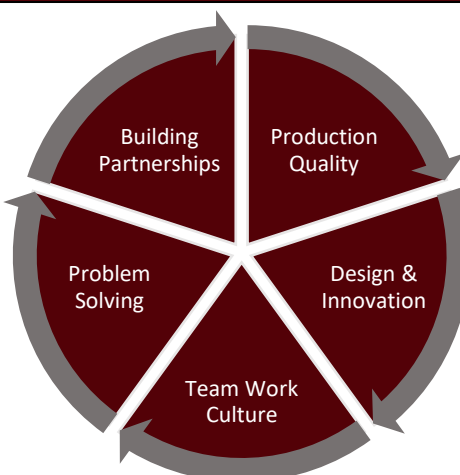

Differentiators

Experience- Over 75 years of business has given us the time to perfect our process and learn the best practices for metal fabrication.

Fine craftsmanship- We pride ourselves in our craftsmanship, our employees are skilled in their trade, and create excellent products. Through the years we have equipped them with advanced machinery to help the process, like our CNC laser cutter.

Personnel- We believe that our people are our best asset. They do not let us down when it comes to quality production created in a timely manner.
